

EMPOWER SOLAR

Electric Vehicle Charging

FAST, AFFORDABLE, CONVENIENT

Get more mileage from solar with an EV charger. Charging at home allows you to skip the wait at public stations, charge fully within just a few hours, and maximize the savings provided by your solar system.

PACKAGES

Explore your options and choose the package that works best based on your car model and lifestyle.

Note: additional work, such as a main service panel (MSP) upgrade or additional runs between the MSP and charger, may be required to support your selected package.

OFFER #1

BASIC

Includes 14-50 receptacle/50 amp breaker combo with 60 amp wire plus electrical certificate

- Ideal for 40 amp (or less) continuous charge rate
- May not be optimal for your specific car/needs
